

The Quixote Windmill Challenge

Windmills in Suffolk Visible from Public Roads

The inspiration for this challenge, based in Suffolk, came from Clare Hinsley, for riders who like to participate but don't have the time to travel long distances. Just visit these Suffolk villages with windmills, then, take a picture to prove you've been there.

The Which3Words word combination for each windmill is included, not to spoon feed you, but to promote the use of this valuable app that can pinpoint where you want to meet up with friends, or even tell the emergency services where you are.

Scoring as follows:

1 point for every picture of you and your bike with some or all of the windmill in the background. Lose half a point if either you or your bike is missing. Both missing means no points.

A tie will be decided by a draw from a hat.

The prize is appropriate and inexpensive, and the award will be made at the December AGM.

Please send entries to secretary@suffolkriders.co.uk by 31 October 2021.

Village	Three words for What3Words.com
Bardwell	proofs.pulse.reinstate
Drinkstone	students.revamping.missions
Holton	strongly.group.blink
Pakenham	backed.design.minivans
Saxtead	
Green	bleaching.sulked.solder
Stanton	change.appoints.peach
TheInetham	lift.estimated.engulfing
Woodbridge	surveyed.outbursts.seabirds

A simple way to use What3Words is to copy the three words in the column adjacent to the village name onto your clipboard, [open the website](https://what3words.com) on your browser and click in the box top left (with a spyglass and a default 3 words), and paste the contents of your clipboard.

Alternatively, take the three words and add them to the website name in your web browser, for example for Bardwell type in

www.what3words.com/proofs.pulse.reinstate

You will see a Google map that usually looks blank, but if you zoom out you will be able to see the location of the windmill. NB you can use the Little Yellow Man to give you a Google Street View too: see also Newsletter #20.

Good luck,
[Chris Austin](#)
